Abstract

...fining technical specifications for quality requirements for the use of animal cells as ... Committee on Biological Standardization in ... ncines in novel continuous cell lines of ... reasing need for the re-evaluation of existing ... ew issues in cell substrate safety arising from ... these new cell types and developments in technology and scientific knowledge. In response to these demands, the WHO Study Group on Cell Substrates was formed in 2006 to initiate revision of WHO requirements and to address the need for further research in this area. At its second meeting on 11-12 June 2007, the Study Group reviewed scientific data that would form the basis for new recommendations and made a number of proposals for further investigations. The Study Group is working on the preparation of a revised WHO document, and a broad consultation with regulators, manufacturers, and other relevant parties is planned for 2008.

Abstract

Fixed-bed combustion in a tube reactor is a useful procedure to exploit a large variety of biomasses obtaining accurate in-bed data. In this paper, the ignition front propagation velocity is experimentally studied in a counter-current process for eight different biomass fuels with a

Disease relapse after haematopoietic stem cell transplantation: Risk factors and treatment

F. Dazzi MD, PhD , Professor of Stem Cell Biology and C. Fozza MD^a, Clinical Research Fellow

^aDepartment of Haematology, Imperial College at Hammersmith Hospital, Du Cane Road, London W12 0NN, UK

Available online 19 April 2007.

Disease relapse is the commonest cause of treatment failure after allogeneic haematopoietic stem-cell transplantation. Adoptive immunotherapy based on donor lymphocyte infusions (DLI) has a prominent role in the management of disease recurrence. Although the

Gene > CLEC4M

view complete details

This gene encodes a type II integral membrane protein that is 77% identical to CD209 antigen, a HIV gp120-binding protein. This protein, like CD209, efficiently binds both intercellular adhesion molecule 3 (ICAM3) and HIV-1 gp120, and enhances HIV-1 infection of T cells. This gene is mapped to 19p13.3, in a cluster with the CD209 and CD23/FCER2 genes. Multiple alternatively spliced transcript variants have been found for this gene, but the biological validity of some variants has not been determined

Title

- Global warming and sexual plant reproduction

Abstract

- The sexual reproductive phase in plants might be particularly vulnerable to the effects of **global warming**.
- Understanding phenotypic plasticity and gametophyte selection for prevailing temperatures, along with possible epigenetic changes during this process, could provide new insights into plant evolution under a **global - warming** scenario.

Article

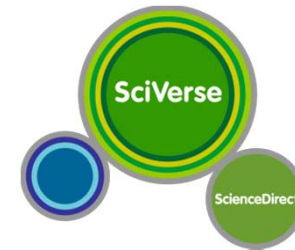

- Although the reasons behind **global warming** are still controversial, its adverse consequences are clear and of increasing concern worldwide.
- Indeed, **global warming** has been shown to affect species ecology, ranging from effects on geographical distribution, phenology or species interaction to extinction risks (reviewed in Ref. [3]).

[Topology and Regulation of the Human eIF4A/4G/4H Helicase Complex in Translation Initiation](#)

Source: Cell , Volume 136 , Issue 3 , February 06, 2009 , Pages 447-460
Authors: Assen Marinchev, Katherine A. Edmonds, Boriana Marincheva, Ethea Hendrickson, Monika Oberer, Chikako Suzuki, Barbara Herdy, Nahum Sonenberg, Gerhard Wagner

... cleavage site. Expression and purification of unlabeled proteins, as well as of proteins uniformly labeled with stable isotopes for the NMR **experiments**, was carried out as previously described for eIF4A-CTD. NMR Resonance Assignments and Chemical Shift Perturbation Assay NMR spectra were recorded at 298 K on a Bruker 750, 600, or 500 MHz, or a Varian Inova 600 or 500 MHz spectrometers, equipped with cryogenic probes. Unless stated otherwise, samples for NMR measurements contained 0.4–1 mM protein in buffer containing 20 mM Tris-HCl (pH 7.0), 150 mM KCl ...

[A Yeast Synthetic Network for In Vivo Assessment of Reverse-Engineering and Modeling Approaches](#)

Source: Cell , Volume 137 , Issue 1 , April 03, 2009 , Pages 172-181
Authors: Irene Cantone, Lucia Marucci, Francesco Iorio, Maria Aurelia Ricci, Vincenzo Belcastro, Mukesh Bansal, Stefania Santini, Mario di Bernardo, Diego di Bernardo, Maria Pia Cosma

... For time series **experiments**, yeast cells of an IRMA-containing strain (P340) were grown at 30°C in YEP containing 2% glucose (YEPD) or 2% galactose and 2% raffinose (YEPGR) until mid-log phase. Cells were then collected by filtration, washed twice with YEP, shifted respectively in YEPGR (for switch-on **experiments**) or YEPD (for switch-off **experiments**), and grown at 28°C. Cells were harvested at different time points for mRNA extraction. For steady-state perturbation **experiments**, centromeric plasmids were constructed as follows. CBF1, GAL4, SWI5 ...

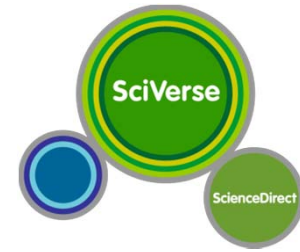

[H2A Z-Containing Nucleosomes Mediate the Thermosensory Response in Arabidopsis](#)

Source: Cell , Volume 140 , Issue 1 , January 08, 2010 , Pages 136-147
Authors: S. Vinod Kumar, Philip A. Wigge

... Experimental Procedures Genetic Screens for Temperature Perception All **experiments** were carried out in Col-0 background. A forward genetic screen of fast neutron mutagenized population of HSP70::LUC reporter strain was carried out to identify mutants perturbed in the ambient temperature perception pathway (seeds irradiated at HAS KFKI-Atomic Energy Research Institute, Hungary). Seven-day-old seedlings were incubated at 12°C for 48 hr before shifting to 27°C for 2 hr and screening for LUC

The screenshot shows the Elsevier Authors Home page for the journal 'Labour Economics'. The page is divided into several sections:

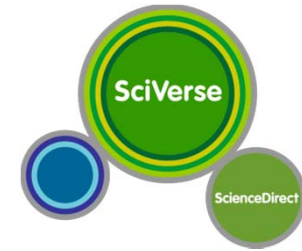

- Search:** A search bar at the top left.
- For Authors:** A sidebar on the left with links such as 'Resource center', 'Guide to publishing with Elsevier', 'Funding body agreements/policies', 'Authors' rights', 'Track your accepted article', and 'FAQ'.
- AUTHORS HOME:** The main heading, with a sub-section 'Locate a journal now:' containing a search box. An orange box highlights this search box, with an arrow pointing to the journal's page.
- Labour Economics:** The journal's page, featuring the journal cover, ISSN (0927-5371), and Imprint (NORTH-HOLLAND). Below the cover is a 'Submit Article' button, which is highlighted with an orange box. Other buttons include 'Order Journal', 'Recommend to Friend', and 'Bookmark this Page'.
- Additional Information:** A sidebar on the right containing links for 'Editorial Board', 'Login to Editorial System', 'European Association of Labour Economics', 'Click here for full Editorial reports', and 'Publishing Ethics Resource Kit (PERK)'. It also includes sections for 'Readers' (Order Journal, Free Tables of contents and abstracts) and 'Authors' (Authors Home, Submit an Article, Track Your Accepted).
- Learn more:** A button at the bottom right, with a list of services: 'Printed order', 'journal issues', 'Customized posters', and 'Publication certifica'.

Two Chinese text boxes are overlaid on the page:

- A box on the left with the text '搜尋期刊' (Search for journals) and an arrow pointing to the 'Locate a journal now:' search box.
- A box in the center with the text '利用EES系統傳遞你的稿件' (Use the EES system to submit your manuscript) and an arrow pointing to the 'Submit Article' button.
